THE BULLETIN

STATE TEACHERS COLLEGE

MOORHEAD, MINNESOTA

SUMMER SCHOOL 1949

FIRST TERM JUNE 15 to JULY 20

SECOND TERM JULY 21 to AUGUST 24

Series 45	May, 1949	Number 1
-----------	-----------	----------

Published quarterly at Moorhead, Minnesota.
Entered as second class mail matter at the post office at
Moorhead, Minnesota, under the act of August 24, 1912.

The 1949 Summer Session

Summer school this year is divided into two five-week terms, the first from June 15 to July 20; and the second from July 21 to August 24. An unusually complete program of offerings has been set up in history, sociology, political science, economics, English, literature, speech, journalism, botany, biology, mathematics, geography, physical science, education, music, printing, drawing, plastics, metalwork, woodwork, art, health and physical education. Where there is not sufficient demand, a course listed may not be given.

There will be, besides regular classes in education, an opportunity to do student teaching on either the secondary or elementary level. Such opportunities are primarily organized for those who are not in school during the regular year.

There will be at least two workshops, the first one a workshop on nutrition, with Miss Marion C. Benson as consultant. Those interested should read details elsewhere in this bulletin. During the last ten days of the session there will be a band clinic under the direction of Bertram McGarrity and Dr. H. Duane Harmon. Refer to later pages in this bulletin for details.

There will be opportunities for recreational and cultural activities, special convocations and lyceum numbers. For the complete schedule of classes, see pages ten and eleven of this bulletin. On page twelve appear course descriptions in brief form.

Tuition & Fees

* For Two Terms

Tuition for residents of Minnesota	\$20.00
Additional tuition for out-of-state residents	5.00
Activity fee	8.00

For One Term

Tuition for residents of Minnesota	20.00
Additional tuition for out-of-state residents	5.00
Activity fee '	5.00

* In order to take advantage of the special rate, students must indicate their intention of attending the second term by registering for both terms at the time of the June 15 registration.

Living Accomodations

The College maintains two attractive dormitories for women, Comstock Hall and Wheeler Hall. Room furnishings, including bed linen, are provided. Towels and dresser scarves are not furnished. Residents care for their own rooms, and must take all meals in the Dormitory Dining Hall. Room and board average \$11.00 a week

with no refund or allowance for absence of less than a week. Application for rooms in these halls should be made to the Dean of Women with a \$5 deposit included.

The new men's dormitory will not be open until the fall quarter. Temporary housing has been provided in the basement of MacLean Hall for the summer session. Rates are \$1.50 a week. These applications should be sent to the Dean of Men, with a \$5 deposit.

Admission

All who wish to attend the 1949 summer session for either term should fill out and return to the Registrar immediately the accompanying blank entitled *Application for Admission*. Those who have attended other colleges or universities must have transcripts of their college credits and statements of honorable dismissal sent to the Registrar by June 1 in order that satisfactory programs may be made out on registration day, June 15. Graduates of Teacher-Training departments similarly should send a record of their credits and experience signed by the county superintendent not later than June 1.

The summer program is not primarily planned nor recommended for students just beginning college, since it is better for them to start in the fall term of the regular year. Those who feel they need to begin in the summer, however, should have their high school credits, together with their applications for admission, sent to the Registrar by June 1.

Registration

Registration for the first five-week session will be held Wednesday, June 15, beginning at 8:00 a.m. Classwork will begin with the first period Thursday, June 16. Except by special arrangement with the president, there will be no registration for first term after June 15. Eight quarter hours is the normal load for each five-week term. Students of exceptional ability may carry nine quarter hours per term without petition.

Special Features of 1949

On this and pages following the schedule, brief consideration will be given to various opportunities in the 1949 Summer Session. These opportunities fall under the headings of elementary education, the workshop on nutrition, industrial arts, the band clinic, speech, journalism, art, science, social studies, physical education, English and education as a whole.

Elementary Education. An unusually rich grouping of courses will be found in this area, including Gen. Sci. 340; Geog. 340; Music 340 (four-year level) and Music 243 (two-year level); Educ. 242 (Reading and Language Arts in Elem. Sch.); Math 240; Soc. Stud. 240; Art 215; Engl. 250; History 120; and Educ. 430 (Supervision in the Elem. Sch.). Attention is also invited to such courses as Sp. 238 (Speech for Community Affairs); Art 411 (Pottery); Plastics 360; Metal 235 (Art Metal); Bot. 214 (Field Biology of Plants); Zool. 216 (Field Biology of Animals); Geog. 210 (World Geography); Journ. 230 (Principles); and Journ. 336 (Direction of School Publications).

General Science 340, which has not been given for some time, will include a study of the new Minnesota Science Conservation Curriculum bulletin, in addition to the making of units, the use of textbooks, laboratory apparatus, live and preserved specimens, and other visual aids. Similarly Geography 340 will stress visual aids as well as methods and materials in general.

Workshop in Nutrition Education. The workshop, to be conducted from June 15 to 29, is for the purpose of helping elementary teachers study the basic principles of nutrition and health education and to show how these principles may be incorporated into the regular elementary school curriculum. Each student will have an opportunity to plan education experiences for specific school situations. It is being sponsored by the College and by the education section of the department of public services of General Mills.

Speech. Offerings in this area will be concentrated in the second term with Sp. 340 (Direction of School Dramatics); Sp. 342 (Direction of School Forensics: debate, declamation, etc.); and Speech 238 (Speech for Community Affairs: club organization, program direction, etc.).

Journalism. In this area there will be Journ. 230 (Principles of Journalism: classification and use of newspapers and magazines); and Journ. 336 (Direction of School Publications).

Education. The 1949 Summer Session has what is probably the most complete offering of education courses in several years, so spaced over the two terms that almost any combination is possible. Student teaching will be offered on both the elementary and secondary levels, these opportunities being primarily organized for the in-service teacher who is completing work for his degree.

Art. Mention has been made of Art 411 (Pottery) and Art 215 (Applied Design). During the first term an opportunity will be offered to take Art 220 or 221 (Structure I or II) or Art 410 (Color).

Science-Mathematics. Mention has been made of Gen. Sci. 340, Geog. 340, Math. 240, Bot. 214, and Zool. 216. Another offering is Bot. 315 (Plant Taxonomy). It is planned also to give Math. 325 (Statistical Procedures) and Math. 230 (Business Accounting) as well as Gen. Sci. 110 and Phys. Sci. 110.

Social Studies. Courses not always offered in summer but on the schedule for 1949 include Hist. 414 (Latin American history); Pol. Sci. 321 (International Law); Soc. 450 (Criminology and Penology); and Econ. 350 (Public Finance). Soc. Stud. 440 (Social Studies in the Secondary School) will also be given.

Language-Literature. Offerings not already mentioned include Engl. 318 (the medieval and modern periods of world literature); Engl. 406 (Modern British and American Poetry); Engl. 214 (Nineteenth Century English literature); Engl. 314 (Whitman and the Rise of Realism); and Engl. 320 (Shakespeare).

Industrial Arts

The Industrial Arts Department's course offerings for the two summer terms have been carefully planned to provide for the needs of three groups of students: (1.) Inservice teachers, (2.) Undergraduate students, and (3.) Men and women who have a hobby or avocational interest. A total of eleven courses are being offered during the two summer terms. The areas in which courses are offered are machine shop, the graphic arts, plastics, drawing, and wood shop.

Two new courses have been developed to fill special needs of teachers in Minnesota. Because of the requirements that will be in the new "Minnesota Industrial Arts Course of Study", an industrial arts teacher must necessarily know much about the graphic arts. Graphic Arts 355 will meet the needs of teachers in this respect. The course will work in letterpress printing, silk screen, offset lithography, stereotype, book binding, paper making, and other related graphic arts activities.

Another course in the schedule that should be considered is Plastics 360. The new course of study requires this subject to be taught.

The Band Instrument Clinic

The band instrument workshop is designed to increase proficiency in performances on individual instruments; to assist in understanding teaching problems peculiar to the several instruments; to provide a survey of new materials for instruments, ensembles as well as solos.

The workshop will be conducted by Dr. H. Duane Harmon and Bertram McGarrity of the college staff. Both men are well equipped through training and experience to offer authoritative instruction of the instruments of the band. Dr. Harmon, the chairman of the Music Department, is an outstanding performer on the trumpet. His background of successful experience includes teaching brass instruments at the State University of Iowa. Mr. McGarrity is well known to this region for his performance as a clarinetist. Prior to coming to this College, he taught woodwind instruments at the University of Illinois.

The facilities of the College and community make for a well-rounded approach to organizing this specialized clinic in this area. Experienced teachers feel the need of intensive work on a limited number of instruments will have this opportunity. Beginning teachers who would prefer to have a less intensive and broader background will have this approach.

Above is pictured the MSTC Campus. Shaded buildings are constructed or under construction. Notice the new men's dormitory, which will be ready for occupancy this fall. Wheeler and Comstock halls are open for the summer term. The College Dining Room is located in Comstock hall.

Summer Recreation

Besides the traditional Summer School Picnic, student teas and other informal social affairs on the campus, summer school students at Moorhead State Teachers College have easy access over highways like the one pictured below to the Western Minnesota lake region and adjacent parks...within an hour's drive. Recreation on the campus may be taken in the form of courses for credit, or it may be on a purely personal basis.

All individuals who register for golf must either own or have access to a set of clubs which they use for the class. Class members will also be required to pay a fee for the use of courses on which they play. Swimming during the summer sessions will be recreational in character, with some instruction if the demand warrants it. A member of the Physical Education department will be on hand at specified hours to issue equipment for daily use in the following sports: swimming, tennis, badminton, archery, shuffleboard, croquet, volleyball, and softball.
